**Dear Sir / Madam,**

Let me inform you about Ukrainian Company “Shvydkist”, which produces and exports products of high-quality environmentally friendly material: copper, grade M1f (CuDhp), for the roofing of private houses, cottages, housing construction, administrative buildings, museums, a building of historical significance. It is a recognized European standard for high-quality roofing material for capital construction.

The company’s copper tiles with a double-wedge (diamond-shaped) profile, as well as ridges and ends, with unusual design forms will serve for hundreds of years. Copper diamond-shaped tiles, ridges and ends are made by the cold-forming method. Die tooling is very complex and has complex shapes. Due to the combined tooling we get strong products elongated in length, width and depth, sufficiently rigid, which are able to withstand external physical influences and thereby ensure the required unique tightness of the locks in the curvilinear connections. The technological process consists of 11 operations.

Copper roofs are not pervious and are fireproof due to the fact that for smoke removal a natural supply and exhaust ventilation and smoke channels are provided for through the inner spheres of copper products. In addition, thanks to these air channels, the explosive force of the wind is evenly distributed throughout the roof area.

“Shvydkist” draft Commercial offer is attached hereto.

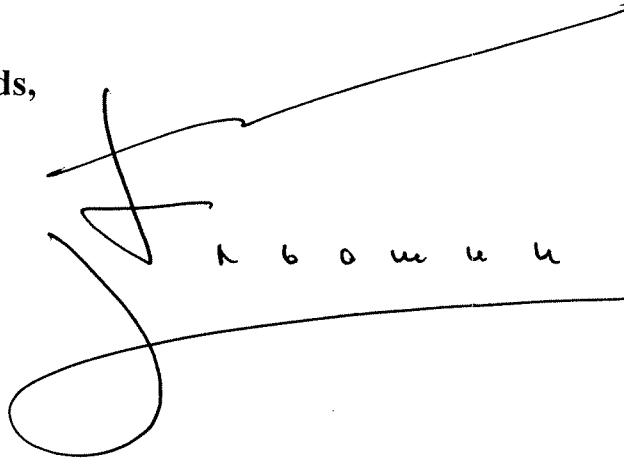

I would be grateful for your kind assistance in forwarding this information to the business leaders of your Chamber / Association who might become potential partners of the above-mentioned Ukrainian company.

For any additional information please do not hesitate to contact the Consulate General via phone (415) 398-5121 (ext. 2) or e-mail: [sf.economicsection@gmail.com](mailto:sf.economicsection@gmail.com).

Enclosure: as stated, on 1 page.

With kind regards,

Consul General
