

Participating Companies and Organizations

California Certified Organic Farmers (CCOF) is a nonprofit organization that advances organic agriculture for a healthy world through organic certification, education, advocacy, and promotion. CCOF is the largest USDA accredited organic certifier and certifies over 4,000 operations in Canada, the United States, and Mexico.

The California Chamber of Commerce (CalChamber) is the largest broad-based business advocate to government in California. Membership represents one-quarter of the private sector jobs in California and includes firms of all sizes and companies from every industry within the state. Leveraging our front-line knowledge of laws and regulations, we provide products and services to help businesses comply with both federal and state law. CalChamber, a not-for-profit organization with roots dating to 1890, promotes international trade and investment in order to stimulate California's economy and create jobs.

California Farm Bureau Federation is a nonprofit organization of farmers and ranchers consisting of county Farm Bureaus from nearly every county in California, established in 1919 to work for the betterment of family farmers and ranchers in California. We are deeply committed to our mission, which is to improve the well-being and quality of life for California farmers and ranchers. We do this through advocacy, ongoing outreach, and economic services and products for those involved in agricultural production.

The California Foundation for Commerce and Education (CFCE) is a nonprofit 501(c)(3) think tank affiliated with the California Chamber of Commerce. CFCE is dedicated to preserving and strengthening the California business climate and private enterprise through: education of the public and policy makers on the virtues of private enterprise and a strong economic base; accurate, impartial and objective research and analysis of public policy issues of interest to the California business and public policy communities; and education and outreach efforts in support of the research and public policy findings and recommendations.

Caylym provides effective, affordable and environmentally sustainable solutions for first responders and disaster relief organizations around the world. The company produces Guardian™ - Container Aerial Fire Fighting System (CAFFS), the Fontana™ – Bulk Potable Water storage, transport and distribution system, and the BullWorks™ Rapid Deployable Barrier system from a fabrication and assembly facility in Fresno California. All of Caylym's systems are 100% recyclable. Caylym's Container Aerial Fire Fighting System (CAFFS) enables almost any rear-loading cargo airplane or helicopter to safely drop water or retardants on a wildfire 24 hours a day. The Guardian enables hundreds of available cargo aircraft to safely and effectively fight wildfires from the air day and night. Caylym's Fontana™ Bulk Potable Water Storage, Transport and Distribution system is an environmentally responsible way to reduce the need for individual plastic water bottles during disaster relief or large crowd support.

Driscoll's is a private, family-owned company headquartered in Watsonville, California. Driscoll's develops its own patented varieties of berries that are grown by independent farmers, both large and small. Driscoll's markets and ships the fruit. Driscoll's sells four fresh berries: strawberries, raspberries, blackberries, and blueberries and for each it has

both organic and conventional production. For many years, Driscoll's berries grew along 130 miles of the California coast from Oxnard to Watsonville. While its berries continue to grow in that area, Driscoll's now operates in 23 countries on six continents.

Golden State Water Company is an investor-owned, rate regulated utility company serving water in over 80 communities throughout California. Golden State Water Company also owns and operates one small electric utility in the community of Big Bear Lake. They provide safe, reliable water and electric service to customers, driving operational efficiency to control costs. They focus on prudent infrastructure investments, which is a critical factor in delivering consistently high-quality service to customers. They've been a California business since 1929.

Iron Horse is one of the finest family owned wine properties in the country and the top American-owned, luxury Sparkling Wine producer in Sonoma County. The estate is a 260-acre reserve in Green Valley, part of the Russian River Valley, renown for growing delicious, cool climate Chardonnay and Pinot Noir. The Sparklings have been served at the White House for six consecutive Presidential Administrations, beginning with the historic Reagan-Gorbachev Summit Meetings in 1985, which ended the Cold War. The White House ushered in the new millennium with Iron Horse, New Year's Eve 1999. Iron Horse wines have also been served at Supreme Court dinners, to the Queen of England and the President of China.

Kern Oil & Refining Co is a small, independent single refinery producing transportation fuels in the heart of California, which has been in continuous operation since 1934. Kern is strongly committed to California's climate goals. As a renewable fuels leader and innovator, Kern has increasingly incorporated renewable diesel, biodiesel and ethanol into its transportation fuels.

Measurabl is the world's most widely adopted software for commercial real estate, environmental, social, and governance (ESG) data management. Over 40,000 commercial buildings representing more than 8 billion square feet across 70 countries currently measure, manage and report ESG performance on the platform in order to improve building operations, comply with governmental regulations and access capital markets.

Monarch Global Strategies LLP (previously ManattJones Global Strategies) is a strategic consulting firm with over 15 years of experience providing senior corporate executives with market and political intelligence, strategic advice and stakeholder engagement support to drive market entry and business expansion efforts in North America, with a particular emphasis on Mexico.

NEXtera Energy is the world's largest producer of solar and wind energy as well as the world's largest utility company. As one of America's largest capital investors in infrastructure, with between \$50 and \$55 billion in new infrastructure investments planned through 2022, NEXtera is helping ensure that the next energy to power our dreams will be American energy. In 2018 alone, more than 57 million tons of carbon dioxide were avoided thanks to NEXtera's emission free power solutions. As a result, the company's total shareholder return was 380% over the last decade, outperforming its peers and the S & P 500.

With more than 2500 members, the San Diego Regional Chamber of Commerce serves as the nexus of connections and collaboration amongst businesses in the San Diego-Baja region. For more than 145 years, the Chamber has been critical in driving the region forward through political advocacy to advance a thriving, connected binational business community and empower the next generation of leaders.

More than 40 million consumers worldwide count on Sempra Energy® companies for a range of energy services. The company's public utilities power homes and businesses in California, Texas, Chile and Peru. Sempra also builds and operates important energy infrastructure in the United States, Mexico and South America with a clear focus on leading the way in developing responsible energy solutions. Sempra's unique combination of diverse expertise, top talent and strong management set a powerful foundation for sustainable growth and a bright future. IEnova, a subsidiary of Sempra Energy, is one of the largest private energy companies in the country, the first energy

infrastructure company to be listed on the Mexican Stock Exchange and to belong to the Sustainable CPI. At the end of 2018, IENova had more than 1,000 employees and approximately \$8.8 billion in total assets, becoming one of the largest private energy companies in the country.

Founded in 1926, Western Growers represents local and regional family farmers growing fresh produce in Arizona, California, Colorado and New Mexico. Our members and their workers provide over half the nation's fresh fruits, vegetables and tree nuts, including nearly half of America's fresh organic produce. Some members also farm throughout the U.S. and in other countries so people have year-round access to nutritious food. For generations our members have provided variety and healthy choices as the first line of defense against obesity and disease. We grow the best medicine in the world.®

Established in 1934, Wine Institute is the public policy advocacy group of 1,000 California wineries and affiliated businesses that initiates and advocates state, federal and international public policy to enhance the environment for the responsible production, consumption and enjoyment of wine. California wineries generate \$114 billion annually in economic activity to the U.S. economy and create 786,000 jobs across the country of which 325,000 are in California. The organization also works to enhance the economic and environmental health of the state through its leadership in sustainable winegrowing and a partnership with Visit California to showcase California's wine and food offerings and the state as a top travel destination. The Wine Institute membership represents 80 percent of U.S. wine production and 95 percent of U.S. wine exports.

Woolf Farming is a family-owned business committed to producing more with less while improving the land they farm. Jack Woolf started farming for others on the west side of the San Joaquin Valley after returning from WWII. When he and his family founded Woolf Farming in 1974, he sought to move away from the region's traditional crop rotation of grains, cotton & melons to higher valued specialty crops that are well suited for the area. These crops include almonds, processing tomatoes, pistachios, garlic and more. Continual reinvestment in land, water infrastructure, and innovation has allowed the Woolfs to successfully expand their operations. In addition to the business "family", Woolf Farming and Processing now includes three generations of Woolfs. The business includes Woolf Farming team members, neighbors, partners, customers, growers, and their surrounding communities

Worldwide Environmental Products, Inc. (Worldwide) is a California corporation that designs, develops, implements, operates and services various types of motor vehicle emissions and safety inspection programs around the world. From the inspection equipment design and maintenance, to database management, quality control and assurance, to personnel training; Worldwide provides turnkey solutions for the successful management and operation of vehicle inspection programs out of its Headquarters in Brea, California.

3 Phases Renewables provides clean and affordable energy solutions to companies, municipalities, utilities, and community choice entities of all forms and sizes. This includes supplying power to some of the largest, most demanding Fortune 500 enterprises. The company takes pride in exceeding its customers' expectations in the clean energy space by providing a portfolio of specialized energy products that include direct access, distributed generation projects, and renewable energy certificates (RECs).
